

# Leo's Problem

"Leo is an astronaut on Mars. He wants to build his own space home with food, a gym, and a comfy bed but he doesn't he does"

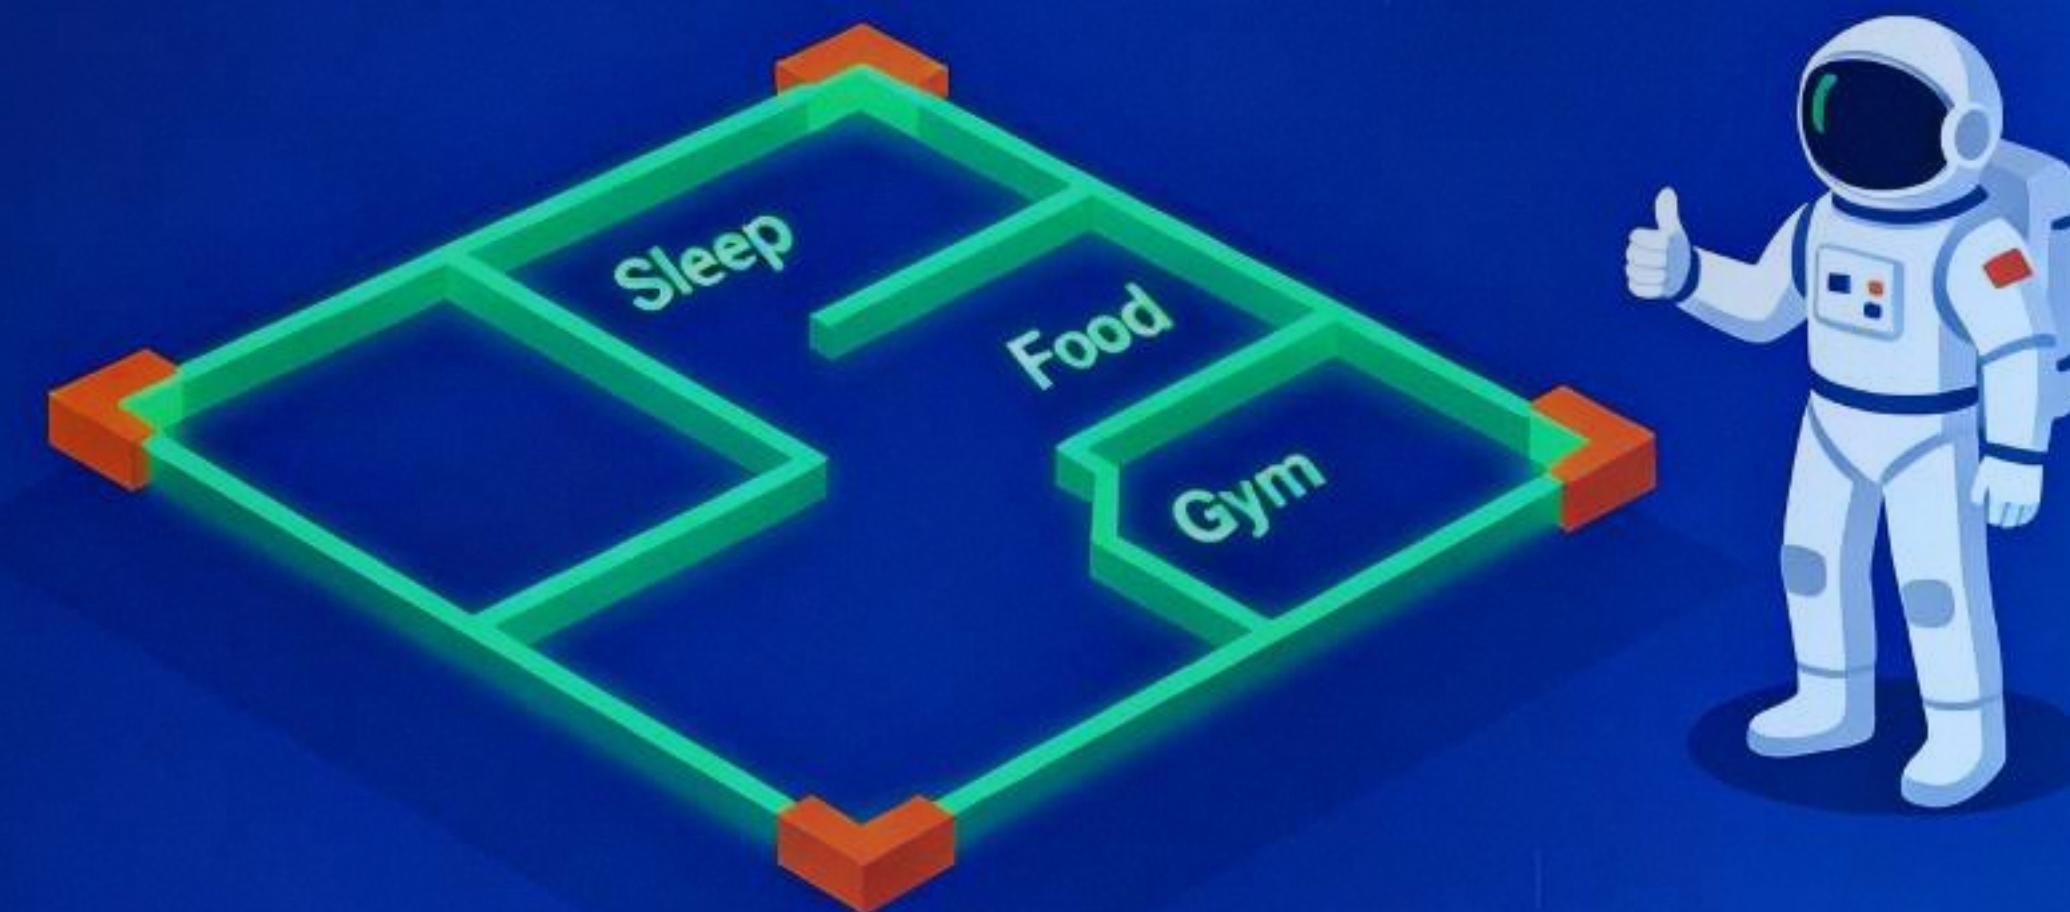

# The Smart App

Then Leo finds a NASA app that designs homes using AI! He just says, "Make a space home for one person with food, gym and sleep are

# The Design Comes Alive!

The app instantly draws the habitat showing where to sleep, eat, and work out. Green lights mean everything fits perf

# Now he have a Home in Space!

Leo sends the plan to NASA and gets all his supplies.

Now he's living, exercising, and growing plants in his perfect home.
