

Leo's Problem

'Leo is an astronaut on Mars. He wants to build his own space home with food, a gym, and a comfy bed but he doesn't he does"

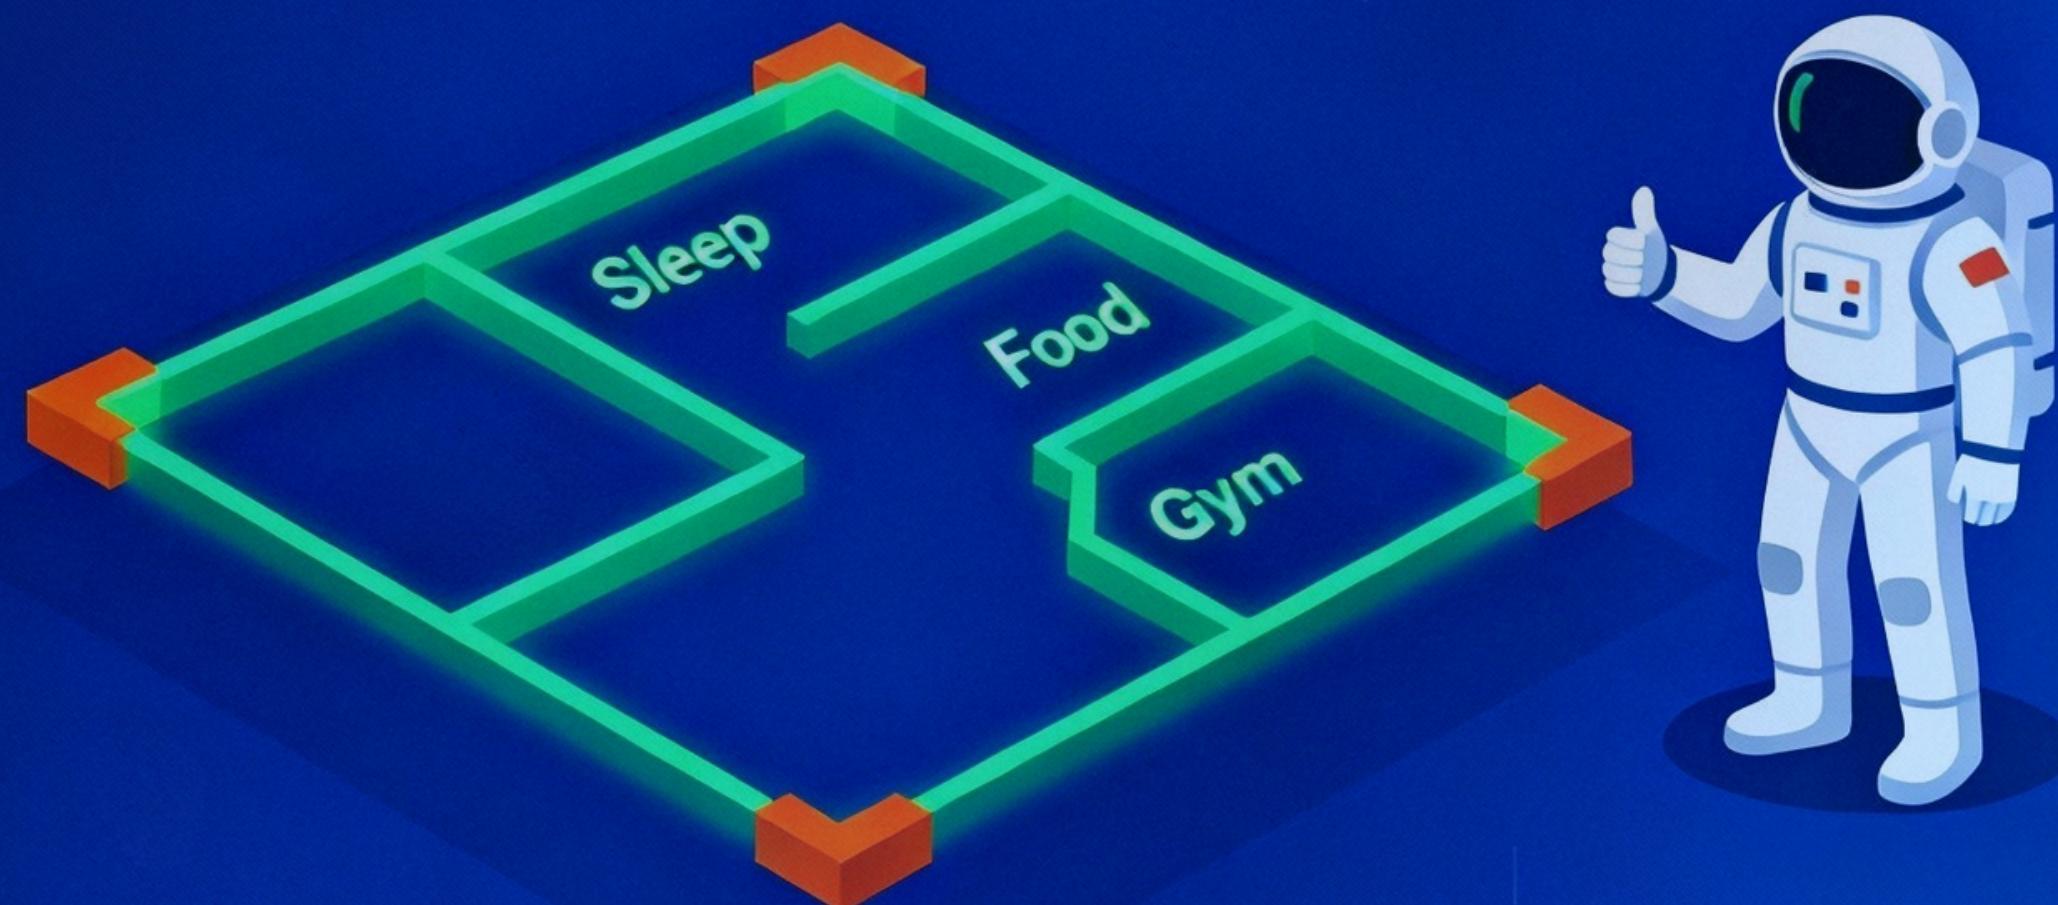

The Smart App

Then Leo finds a NASA app that designs homes using AI! He just says, "Make a space home for one person with food, gym and sleep area".

The Design Comes Alive!

The app instantly draws the habitat showing where to sleep, eat, and work out. Green lights mean everything fits perf

Now he have a Home in Space!

Leo sends the plan to NASA and gets all his supplies.

Now he's living, exercising, and growing plants in his perfect home.
